

THANK YOU TO OUR STAFF

Medical Home Care Professionals would like to recognize our amazing nursing, therapy, social services, personal care attendants, and administrative staff for their tireless work during our COVID-19 Pandemic.

We are grateful and thankful for the support our staff provides our patients on a daily basis. They have consistently supported the needs of our community since the beginning of the pandemic, and have adapted to the ever-changing processes that have been implemented to safeguard the welfare of our patients and entire team.

A special thank you to the families and friends that support our staff. Thank you for sharing your loved one with us as they go out into the community and give of themselves in such a caring and unselfish manner.

Medical Home Care Professionals was founded on the principles of helping people stay home to heal in the comfort of their homes, with their families and familiar surroundings. It is not lost on us how critical it is to have such a dynamic team that holds this mission so close to their hearts.

So, the next time you think of a super hero, please remember the nurse that comforted you and reassured you everything was going to be ok. Or the therapist that helped you do what you thought you would never be able to do again. The social worker that connected you to resources, and helped you through the maze of paperwork to get a needed service. The personal care attendant that is there for you to keep you company, prepare meals, laugh with you, and help to make your day better. The administrative team that is behind the scenes supporting the staff, ensuring they are taken care of so they can take care of you and your families without worry.

We are honored to work with such an amazing team, thank you for all you do. And thank you Shasta and Tehama counties for believing in us and trusting us to provide all your care needs since 1985. There is no us without you!!
